

PREMIUM NATIVE MIX

Premium Native Mix has been specially formulated through years of experience crafting professional low phosphorus blends for growers, landscapers, local councils and developers. It is a free draining mix designed to provide the ideal growing conditions for low phosphorus tolerant plants such as Australian natives and proteaceae plants.

AVAILABLE IN 30L BAGS

BENEFITS OF PREMIUM NATIVE MIX:

- Professional grade, low phosphorus specialty mix
- Feeds plants for up to 9 months
- Added granular wetting agent
- Ideal for the proteaceae family
- Ideal for use as a planting mix or a soil improver in a native garden
- Certified soil for Australian natives and other drought tolerant plants
- Added iron, gypsum, rock minerals and trace elements for all round soil health and structure
- Use as a planting mix and general soil (not recommended as a potting mix)
